SiX
## EVA Custom Carry Case

The SiX Custom Carry Case is the perfact solution to transporting SiX and protecting it from the rigours of travel. The sturdy black case is made from moulded and textured Ethylene Vinyl Acetate (EVA) and is carefully engineered to be both stylish and functional. The semi-rigid shell is lightweight and flexible, while the custom moulded interior offers a snug fit for SiX with dedicated space for the power supply and mains cable. Lined with a soft velvet finish, the thick foam padding in the lid and firm sculpted moulding in the base keep the SiX firmly in place with a protective boundary to the exterior shell. The case has a comfortable expanding handle making it easy to pick-up and large SSL branded rubber zip tabs allow smooth opening of the case lid.
