

iPort Surface Mount Glass Installation Instructions

*DO NOT USE WITH SURFACE MOUNT PRO 12.9**

These instructions are intended to help you mount your Surface Mount to a glass surface next to an aluminum channel window.

Step 1

Adhere the adhesive strips on the back of the Surface Mount bracket as shown.

Step 2

Cut a piece of the adhesive strip where the lightning cable will route behind Surface Mount.

Step 3

Drill a 3/8" small hole and route the cable down the aluminum channel and out the hole. Make sure there is enough length.

Step 4

Connect the iPad and place it in the bezel. Attach the bezel to the bracket. Adhere the Surface Mount bracket to the glass close to the channel.

Step 5

Adhere the backing label to the opposite side of the glass to hide the back of the Surface Mount and iPad.
