

SUMMIT SERIES

Product Series Brochure

Introducing the Summit Series, a collection of the finest and most capable loudspeakers ever produced by JBL for residential applications. Developed at JBL's legendary Acoustic Center of Excellence in Northridge, California, each model has been designed and engineered to be the best-in-its-class. Utilizing patented and proprietary acoustic technologies, these loudspeakers attain new heights of high-fidelity sound and render music with clarity, detail, and dynamics like never before.

PROJECT EVEREST, FIRST INTRODUCED IN 1985, AND PROJECT K2 THAT FOLLOWED, INTRODUCED THE CONCEPT OF FLAGSHIP TECHNOLOGICAL SHOWCASES THAT HIGHLIGHTED JBL'S LOUDSPEAKER ENGINEERING EXPERTISE.

Subsequent variants of both models delivered improvements in sonic performance along with new materials, finishes, and designs that were superior to those before. Like their namesake mountains, Everest and K2 models have always been the highest pinnacle for discerning music enthusiasts. It is upon this solid foundation that the Summit Series is built.

SERIES HIGHLIGHTS

THE SUMMIT OF LOUDSPEAKER PERFORMANCE

Patented JBL compression and dynamic drivers

Patented High-Definition Imaging (HDI™)
Sonoglass® horns

Differential Drive woofer motor structure

SUMMIT PUMORI

3-WAY, 10-INCH (250MM) FLOORSTANDING REFERENCE LOUDSPEAKER

The JBL Summit Pumori is a floor-standing reference loudspeaker built for the discerning music enthusiast. Summit Pumori is the flagship of the Summit Series for the 10-inch (250mm) woofer categorization.

Pumori (pu-mori)

Nicknamed “Everest’s Daughter”, rising to a height of 7,161m (23,494’) and situated just 8km (4.9 miles) west of Everest, Pumori is literally in the shadow of Everest. Mount Pumori is an attractive mountain that lies in upper Khumbu region of Nepal-Tibet. Climbers often use Mount Pumori to build confidence and gain technical skills before attempting to climb Everest.

SUMMIT PUMORI

PRODUCT HIGHLIGHTS

Patented D2815K 1.5-inch (38mm) Dual-diaphragm, Dual-motor High-frequency Compression Driver

Patented High-Definition Imaging (HDI™) Sonoglass® High-frequency Horn

8-inch (200mm) Cast-frame, Triple-layer Hybrid Carbon Cellulose Composite Cone (HC4) Mid-bass

10-inch (250mm) Cast-frame, Triple-layer Hybrid Carbon Cellulose Composite Cone (HC4) Woofer

MultiCap™ Crossover Network with Single-wire and Bi-amp/Bi-wire Connectivity

SUMMIT MAKALU

3-WAY, 12-INCH (300MM) FLOORSTANDING REFERENCE LOUDSPEAKER

The JBL Summit Makalu is a floor-standing reference loudspeaker built for the discerning music enthusiast. Summit Makalu is the flagship of the Summit Series for the 12-inch (300mm) woofer category.

MAKALU (maa-kuh-loo)

The world's 5th highest mountain at 8,481m (27,825') and located 19km (12 miles) from Mount Everest. Makalu has an almost perfect pyramid shape with four sharp ridges climbing up to its summit. The first climb attempts were in 1954, with the first successful ascent in May of 1955 by a French team. Makalu is an isolated peak whose shape is a four-sided pyramid.

SUMMIT MAKALU
