APPLICATION NOTES - HOTEL/ENTERTAINMENT COMPLEX

1 PROGRAM SECTION

PROGRAM 1: JUKEBOX

PROGRAM 2: BACKGROUND MUSIC

PROGRAM 3: DJ MIXER

PROGRAM 4: LIVE PERFORMANCE

2 MIC/LINE SECTION

OPTION 1: GUITAR

OPTION 2: PAGING MICROPHONE

OPTION 3: ANNOUNCER

A paging mic is also available to give staff the ability to page into any individual or combination of zones.
3 ZONE SECTIONS
ZONE 1: POOL BAR

The Pool Bar is receiving the BGM feed as well as the promo feed. The ZM3 remote can control adjust BGM level and source selection. It can also be wired to control the Auxiliary Mic/Line In connection if needed.

ZONE 2: BALCONY BAR

The Balcony Bar has a ZM3 remote that is taking a feed from the DJ and also has a solo guitarist playing in between DJ sets. The remote volume control allows bar staff to set the zones volume to suit the bar ambience. When the entertainment is over, the bar staff can simply switch to the Live Room feed, Jukebox or BGM feed.

ZONE 3: LIVE ROOM

The Live room is taking the stage feed from the FOH mixing console. Again maximum level can be set from behind the bar. Program 4 can also be set to have priority over all other program inputs so, if required the band can override the jukebox or BGM source. The ZM3 remote also gives bar staff the ability to switch to the DJ feed in the breaks between band sets. Or from the ZM3 the promo mic or the solo guitarist feed can be fed through to this or any of the other zones.

ZM3

The Australian Monitor ZoneMix 3 is an extremely versatile and innovative mixer and signal router. Featuring a broadcast quality audio spec, the ZoneMix 3 allows remote selection of 4 stereo sources to 3 stereo zones, one stereo source can have selectable priority per zone and each stereo zone boasts 5 stage equalisation. The ZoneMix 3 also has the ability to route two independent mic or line signals to any single zone or combination of zones. Add to this remote volume control and source selection in each zone via the ZM3R remote and the ZM3M 3 zone paging microphone (both running via inexpensive CAT5 cabling) and you have an extremely high quality Zone selecting mixer at a fraction of the cost of other products in this market.

ZM3R

The ZM3R is a simple yet stylish accessory for the ZoneMix 3 that allows for source selection and volume control from a remote zone. It features ample label space and a contemporary black décor. Running via industry standard CAT5 cable the ZM3R is another product from Australian Monitor Installation Series that provides a simple yet elegant solution to a complex zoning application.

ZM3M

The ZM3M is a slim line paging microphone that provides the user the ability to page into any combination of zones from a remote location. Running both audio and data down inexpensive and industry standard CAT5 cable the ZM3M is simple to install and the LED indicators provide the user with extensive visual feedback.
